Remarks/Arguments:

The applicant would like to thank the examiner for the telephonic interview on April 23, 2008 in which the Moss reference and the claims were discussed.

The above Amendments and these Remarks are in reply to the Office Action of March 27, 2008.

Claims 1-6, 27-31 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moss (JAVA Servlets) in view of Houghlind et al. (Core JSP) and further in view of Schildt (JAVA 2).

Claims 1, 14, 27 and 40, as amended, include the feature that "a raise event method is called to raise events in the raise events lifecycle stage". This feature is not shown or made obvious by the cited prior art.

For example, Moss shows the use of **HTTP** data rather than the use of a raise event method.

In light of the above, it is respectfully submitted that all of the claims now pending in the subject patent application should be allowable, and a Notice of Allowance is requested. The Examiner is respectfully requested to telephone the undersigned if he can assist in any way in expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment to Deposit Account No. 06-1325 for any matter in connection with this response, including any fee for extension of time, which may be required.

Respectfully submitted,

Date: __April 24, 2008_____
